Namrata Uday Devadiga (nd2561)
Raymond Fan (rf2598)

Project Name: Parq

All the user stories promised in the second iteration were completed. The user stories are as follows:

1. Advanced Search Parking Spot
a. As a buyer I want to search for a parking spot near a specific location.

2. Parking spot map feature
a. As a buyer I want to see a map of where a parking spot is located

3. Messaging (Buyer)
a. As a buyer, I want to click on a parking spot at a location I am interested in and message the seller about my interest.

b. As a buyer I want to see messages I sent to sellers (approved and pending).

4. Messaging (Seller)

a. As a seller, I want to view messages/requests sent to me from potential buyers.

b.As a seller, I want to approve a user for renting my parking spot.

5. Valid addresses verification
a. Make sure that addresses entered by users are valid.
